

# Inspired by the nature of milk

Consuming organic milk means not only to be aware of a healthy next generation, but also to take responsibility for a sustainable and ecological environment.

# We develop **tailor-made recipes** in close cooperation with our customers

We are a global market leading food ingredient supplier producing and distributing worldwide a comprehensive portfolio of milk and whey derivatives based on organic cow, goat, sheep, A2 milk, GMO-free and lactose-free milk.

## Organic cow, goat, sheep & specialty

As a partner of the international food industry, we offer our cow products in organic quality, A2 and GMO-free. Selected goat products are available in organic quality as well.

## Our market segments are versatile

The primary market segments are infant nutrition, dairy, chocolate and confectionery, nutritional supplements, family nutrition, sports nutrition etc.

## Our speciality are custom dairy products

Due to our flexible system setup, over 190 employees produce an annual output of over 40,000 tons with state-of-the-art membrane and filtration technologies.
